1- Day Information Technology Training

A260 IT MICS in the Server-Based, Server-Assisted and Remote Gaming Environment

We will discuss the current MICS objectives in a server-associated environment and equate those objectives to the risks associated with the gaming conducted dependent thereon. At a general level, the functionality of the systems will be reviewed with emphasis on why the IT department is now moving onto the gaming floor. Furthermore, the need for strict controls over access by external parties, particularly remote access, will be highlighted. Attendees will gain an enhanced appreciation for the heightened level of risk associated with server-based, server-assisted and remote gaming.

A255 Information Technology (IT)

We will discuss the MICS specific to the IT process. Topics will include, but not be limited to: physical access and maintenance controls, system parameters, user/service/default accounts, administrative access, backups and record keeping (inclusive of electronic storage), network security (inclusive of remote access), changes to production environment, and the IT department and in-house developed and purchased systems. Case studies will be reviewed based on the experience of the Audit Division of how deficient internal control systems have contributed to the occurrence of irregularities. Attendees will gain an enhanced understanding of the vulnerabilities associated with IT and how the MICS are intended to mitigate that risk.

Who Should Attend: Tribal gaming operators and regulators, accounting practitioners, and IT professionals and others responsible for facilitating the communication expectations between customers, vendors and employees.

Professional Experience Level: Attendees should possess a general understanding of gaming IT programs and applications.

Michael L. Curry

Michael Curry is the Information Technology Auditor for the National Indian Gaming Commission. He embarked on his career with the agency in February 2009 and has become the primary Information Technology liaison between the NIGC and the Tribal Gaming Authorities and Tribal Casinos.

Michael has extensive knowledge and experience in Information Technology both within and outside of the gaming industry. As Control Assurance IT Audit Manager for Enterprise Risk Services for Deloitte & Touche Las Vegas, he was directly responsible for the internal audit for financial reporting for a multi-billion dollar gaming portfolio - Sands Corporation, encompassing all U.S and Macau China operations, MGM Mirage and each of its wholly-owned properties, Bally's Technologies Inc., Boyd Gaming Corporation, Shuffle Master Inc., (U.S, Australia and Austria) and Fontainebleau Resorts.

As Manager of IBM Global Services, Michael was accountable for the custom-design and delivery of 150 fully-managed, outsourced e-Business Fortune 500 business enterprises.

Prior to IBM, Michael retired from the United States Air Force after serving a 20 year career as a civil and electrical engineer. Michael graduated from Webster University with both an MBA in Business and a Masters in Computer Sciences. He graduated from Colorado Technical University with a Bachelors degree in Electronic Engineering and holds the Computer Information Systems Auditor certification.
